PLOVER ANALYTICS · TABLES ANNEX

Japanese regional banks: key statistics

Tables annex to the 23 September 2026 note · all figures as of 2026-09-23

Every figure below is drawn from the tables behind the research note, frozen at `as_of=2026-09-23`. Published figures are quoted exactly as published; the three calculated measures are named in §11. A figure a source does not publish is `–` and is never treated as zero.

1. The four findings

#	QUESTION	ANSWER	THE NUMBER
1	Did the lending margin genuinely widen?	Yes	Core profit +61% against interest income +28% over two years
2	Where did the margin gain go?	Into the bond book	FY2025 bond losses were 106% of the two-year gain in interest income
3	Who is adding duration?	The regionals, not the megabanks	Regional JGBs +41%, city banks –2% over two years
4	Do the accounting loss and the supervisor's measure agree?	No	Rank correlation 0.31; one name shared between the two worst-ten lists

2. Japanese government bond yields

DATE	5-YEAR	10-YEAR	30-YEAR
29 Mar 2024, FY2023 close	0.372%	0.750%	1.789%
31 Mar 2025, FY2024 close	1.113%	1.497%	2.480%
31 Mar 2026, FY2025 close	1.804%	2.366%	3.640%
15 Sep 2026, cycle high	2.338%	3.028%	4.106%
17 Sep 2026, latest	2.322%	2.993%	4.047%

3. Lending and deposit rates, by lender

Average contracted rate on loans made during the month (Bank of Japan, IR04), and the average posted ordinary deposit rate (IR02). A change in a rate is in percentage points.

LENDER	MAR 2024	MAR 2026	JUL 2026	CHANGE SINCE MAR 2024
City banks	0.897%	2.007%	1.778%	+0.88pp
Regional banks	0.854%	1.682%	1.752%	+0.90pp
Second-tier regional	0.974%	1.711%	1.798%	+0.82pp
Shinkin banks	1.435%	1.979%	2.194%	+0.76pp
Ordinary deposits, posted	0.002%	0.250%	0.322%	+0.32pp

Deposit rates are to September 2026, the latest month published; the series is monthly from April 2022 only.

4. Regional banks — group profit and loss

Fiscal years to 31 March, ¥bn. Published by the FSA in ¥100mn; shown here divided by 10, an exact conversion.

LINE	FY2021	FY2022	FY2023	FY2024	FY2025	TWO-YEAR CHANGE
Net interest income	3,744	3,785	3,884	4,237	4,975	+1,091
Gains and losses on bonds	−189	−648	−477	−475	−1,156	−679
Core net business profit	1,525	1,682	1,641	1,958	2,637	+996
Net income	854	878	958	1,309	1,804	+846

5. Government bonds held, by bank group

¥tn at each 31 March.

GROUP	2020	2021	2022	2023	2024	2025	2026	TWO-YEAR
Regional banks	13.7	14.7	15.0	12.7	14.7	19.5	20.8	+41%
Second-tier regional	2.8	2.9	2.8	2.6	3.1	3.8	4.6	+51%
City banks	41.7	69.3	75.7	65.1	56.6	55.9	55.5	−2%

6. Regional banks — deposits, loans and securities

¥tn at each 31 March, with the loan-to-deposit ratio.

	2020	2021	2022	2023	2024	2025	2026
Deposits	278.3	306.0	318.7	325.3	332.7	336.0	342.6
Loans and bills discounted	220.8	231.0	238.2	249.3	258.0	267.2	279.9
Securities	66.5	74.1	75.6	72.1	78.5	80.3	79.3
Loan-to-deposit ratio	79.3%	75.5%	74.7%	76.6%	77.5%	79.5%	81.7%

7. Unrealised gains and losses on securities — group totals

	¥TN
Available-for-sale bonds, all regional filers	−3.42
of which government bonds	−1.91
All available-for-sale securities, including equities	3.47

Across the 67 regional filers of 74 whose accounts reconciled in full. A negative figure is an unrealised loss; the all-securities line is positive because equity gains exceed the bond losses.

8. Per bank — unrealised bond loss against net assets

Every regional filer whose bond-book extraction passed each gate, worst first. Median 13.9%. The last column is the same bank's own Basel figure from §10, where it publishes one.

#	BANK	CODE	TIER	BOND LOSS, ¥BN	÷ NET ASSETS	SECURITIES, ¥BN	ΔEVE ÷ TIER 1

9. Per bank — securities maturing beyond ten years

Share of the securities maturity ladder sitting beyond ten years, longest first. Median 21.2% across the 38 regional banks whose note prints a six-bucket ladder. The ladder is principal amounts as the note states, not balance-sheet book value.

#	BANK	CODE	BEYOND 10 YEARS, ¥BN	LADDER TOTAL, ¥BN	SHARE
1	Jimoto Holdings	7161	240	344	69.8%
2	Shizuoka Financial Group	5831	1,542	2,424	63.6%

38	Fukui Bank	8362	11	907	1.2%

10. Per bank — Basel rate risk in the banking book (IRRBB1)

The fall in the economic value of the banking book under the worst of six prescribed rate shocks (ΔEVE), against Tier 1 capital, exactly as each bank printed it in its own Pillar 3 disclosure. Sorted by the ratio. A ratio above 15% marks an outlier for supervisory attention under the Basel standard; it is not a breach. The code is the FSA institution code, not a securities code; a bank whose annual report is filed by a holding company keeps its own name here.

#	BANK	FSA CODE	AS OF	ΔEVE, ¥BN	TIER 1, ¥BN	÷ TIER 1	ΔNII, ¥BN	CHECK

11. Definitions, coverage and caveats

The three calculated measures. Everything else is a published figure.

MEASURE	FORMULA
Unrealised bond loss ÷ net assets	available-for-sale bond difference (book value − cost, as printed) ÷ consolidated net assets from the same report × 100
Share beyond ten years	securities maturing beyond ten years ÷ the sum of all six maturity buckets × 100
ΔEVE ÷ Tier 1	largest ΔEVE of the six scenarios ÷ Tier 1 capital, both as printed in the same table × 100

Coverage.

	COUNT
Regional and second-tier regional institutions on the FSA list	98
...publishing a rate-risk table we could retrieve	71
...of those, read without a flagged check	56
...with a flagged check, shown as printed	15
Bank filings with a parsed bond book	98
...passing every reconciliation gate	86
Regional filers in the group totals	67

Caveats.

- 27 of 98 institutions publish a rate-risk table we could not retrieve, mostly because their websites block automated access. The distribution in §10 is of the 71 that we could.
- Eight holding companies publish a single table covering several banks — Fukuoka Financial Group's covers four, Yamaguchi's three — so the rows in §10 come from 59 distinct documents, and those banks are not independent observations.
- The maturity ladder in §9 is principal, as the note states, so it does not reconcile to the balance-sheet securities line in §6.
- Filings that failed a reconciliation gate are excluded from every ranking and group total here, and are shown only on their own company page.
- No share price data is held under licence, so nothing here says whether any of this is reflected in the price.

Sources. Ministry of Finance (yields); Bank of Japan, databases IR04 and IR02 (loan and deposit rates); Financial Services Agency, summary of bank financial results and the annual list of regional and co-operative institutions; Japanese Bankers Association, Analysis of Financial Statements of All Banks; annual securities reports filed on EDINET; and each bank's own Basel Pillar 3 disclosure. Every rate-risk figure records the source URL, the document's SHA-256 and the page.
